**Don't know what's on your reels?**

That's OK. Our Interim Service allows you to get a preliminary transfer of your reels to DVD. Each of the small reels will be in their own Chapter and the larger reels will have Chapters where it looks like the subject has changed. There will be NO title on the Chapters because we won't know what they are.

So when you get the preliminary DVD, watch it and decide the Title for each Chapter (London 1998, Sue's 1<sup>st</sup> Birthday, etc.) and if you want them moved around in a different order. If there's a Chapter you don't want, we can remove it too. You will have up to 2 weeks to tell us what changes you want made. Then we will redo the DVD and give you a completed one. For info and price, see Interim Service, located on the 8mm Prices page on our website.

**Estimating the amount of film on your reels**

Most movie reels have ruler type markings on the face of the reel. This is to help you estimate how much is on it. Make sure you're using the one marked "feet" and NOT metres. If your reels are full you can use the chart below.

3 inch reel (7.5 cm)..... equals .....	50 feet of film	6 inch reel (15 cm) .....	equals .....	300 feet of film
4 inch reel (10 cm)..... equals .....	100 feet of film	7 inch reel (18 cm) .....	equals .....	400 feet of film
5 inch reel (12.5 cm)..... equals .....	200 feet of film			

All 3 inch reels are billed at 50 feet regardless of how much is on it. All other sizes are billed to the next 50 feet of ACTUAL film on the reel. In other words, if you have a 7 inch reel (holds 400 feet), but there's only 125 feet on it, the cost is only for 150 feet. **If your reel has been overfilled**, add 50 feet to the amount for a more accurate estimate.

**You do NOT need to figure out how much film you have. We are happy to do it for you.**
